Pro versions of VCarve Pro are for more experienced users who have enough time and money to master the software and produce a high-quality carvings that clients will be willing to pay for. For instance, you might have a VCarve Pro 6 or Pro 7 license that you use to create carvings of great quality, but you can still charge only \$20 for your carving as a VCarve Express user because you can't create the same level of quality as VCarve Pro users can. The free version of VCarve Express is for everyone else and is the version we recommend. It's good enough for most hobbyist carvings but will not produce a carving of the same level of quality as VCarve Pro. Once you are ready to invest in VCarve Pro, check the price and features and see what license works best for you. ## The Basics of VCarve Pro VCarve Pro is a cross-platform tool that's available in both Windows and Macintosh versions. It's available for purchase as a single package or as a set of individual components, including VCarve Express (Figure 3-13). Most carvers use VCarve Pro, but most VCarve Pro owners use VCarve Express. **Figure 3-13** VCarve Pro components and license information The latest version of VCarve Pro is VCarve Pro 7. There are also older versions of VCarve Pro, but they aren't as well known and used. VCarve Pro 2 is the most common version of VCarve Pro available. VCarve Pro is released as part of the VCarve package, which is licensed by the user. The VCarve package also includes VCarve Express, an editor that is free, and the VCarve carver, which is paid. These parts of the package all come in a single setup (Figure 3-14). **Figure 3-14** VCarve package and components The user can purchase VCarve Pro from several

different companies, but if you purchase VCarve Pro from them, they give you a license key. It's important that the license key that you receive is for the version of VCarve Pro that you purchased from them. If you have a version of VCarve Pro on a different CD or DVD or from a different company, you need to know whether that license key is for the version 82157476af
